New Forests 5: 377–380, 1991

Contents Volume 5 1990/91

Volume 5 No. 1

Payandeh, B.: Composite site-productivity functions for Northeastern Ontario black spruce 1

Tung, C.-H. and Deyoe, D.R.: Dormancy induction in container-grown *Abies* seedlings: Effects of environmental cues and seedling age 13

Ross, S.D. and Bower, R.C.: Promotion of seed production in Douglas-fir grafts by girdling + gibberellin $A_{4/7}$ stem injection, and effect of retreatment 23

Hilger, A.B., Tanaka, Y. and Myrold, D.D.: Inoculation of fumigated nursery soil increases nodulation and yield of bare-root red alder (*Alnus rubra* Bong.) 35

Martin, K.J., Tanaka, Y. and Myrold, D.D.: Peat carrier increases inoculation success with *Frankia* on red alder (*Alnus rubra* Bong.) in fumigated nursery beds 43

Edson, J.L., Wenny, D.L. and Fins, L.: Inducing long-shoot growth for vegetative propagation of western larch 51

Jusoff, K.: Effect of compaction of soils on growth of *Acacia mangium* Willd. under glasshouse conditions 61

Volume 5 No. 2

Tanaka, Y., Brotherton, P.J., Dobkowski, A. and Cameron, P.C.: Germination of stratified and non-stratified seeds of red alder at two germination temperatures 67

Grossnickle, S.C., Major, J.E., Arnott, J.T. and Lemay, V.M.: Stock quality assessment through an integrated approach 77

Morris, D.M. and Forslund, R.R.: A field-oriented competition index for young jack pine plantations and a computerized decision tool for vegetation management 93

Harrington, T.B., Tappeiner II, J.C. and Hughes, T.F.: Predicting average growth and size distributions of Douglas-fir saplings competing with sprout clumps of tanoak or Pacific madrone 109

Margolis, H., Vézina, L.-P. and Bellefleur, P.: Influence of near-ultraviolet light enhancement and photosynthetic photon flux density during photoperiod extension on the morphology and lignin content of black spruce seedlings 131

Singh, D.P., Hooda, M.S. and Bonner, F.T.: An evaluation of scarification methods for seeds of two leguminous trees 139

McDonald, P.M.: Container seedlings outperform barefoot stock: Survival and growth after 10 years 147
Jayawickrama, K.J.S., Jett, J.B. and McKeand, S.E.: Rootstock effects in grafted conifers: A review 157

Volume 5 No. 3

Knowe, S.A.: Simultaneous prediction of the development of loblolly pine and woody competitors in young plantations 175
Rose, R., Atkinson, M., Gleason, J. and Sabin, T.: Root volume as a grading criterion to improve field performance of Douglas-fir seedlings 195
Rossi, P.: Length of cuttings in juvenile development of a hybrid poplar clone 211
Capo-Arteaga, M. and Newton, M.: Survival and growth of five species of *Pinus* seedlings after different approaches to competition control: "bridging" studies between Oregon and Mexico 219
Peiying Chang, Manling Lin, Shijin Zhao, Cheng Chang and Laisuo Guo: Promotion of germination of coniferous seeds by snow stratification combined with dehydration-rehydration treatment 239
Ritchie, G.A.: The commercial use of conifer rooted cuttings in forestry: a world overview 247

Volume 5 No. 4

Bronson, M.R. and Dixon, R.K.: Cultural factors influencing adventitious shoot and plantlet formation from slash pine cotyledons 277
Woollons, R.C. and Snowdon, P.: Utility of multivariate analyses in examining foliage composition and soil nutrition in a factorial fertilizer experiment 289
Omi, S.K., Rose, R. and Sabin, T.E.: Effectiveness of freezer storage in fulfilling the chilling requirement of fall-lifted ponderosa pine seedlings 307
Sweeney, J.D., El-Kassaby, Y.A., Taylor, D.W., Edwards, D.G.W. and Miller, G.E.: Applying the IDS method to remove seeds infested with the seed chalcid, *Megastigmus spermotrophus* Wachtl, in Douglas-fir, *Pseudotsuga menziesii* (Mirb.) Franco 327
Timmer, V.R. and Miller, B.D.: Effects of contrasting fertilization and moisture regimes on biomass, nutrients, and water relations of container grown red pine seedlings 335
Castellano, M.A. and Trappe, J.M.: *Pisolithus tinctorius* fails to improve plantation performance of inoculated conifers in southwestern Oregon 349
Tuskan, G.A. and Ellis, P.L.: Auxin-impregnated hygroscopic gel: effects on ponderosa pine and common hackberry seedlings 359
